

PACKAGING FOR DOG TREATS

ABSTRACT OF THE DISCLOSURE

The invention provides a lightweight and uncomplicated package and method for packaging animal treats. The package includes a coffee cup defining an inside volume to receive the animal treats and including a rim surrounding an upper end of the inside volume. A lid is removably fastened to the rim of the coffee cup, the lid adapted to at least partially cover the animal treats. In another embodiment of the present invention the rim of the coffee cup is sealed with a removable seal and in a further embodiment of the present invention the animal treats are bagged prior to being placed within the coffee cup. The animal treats suitably may include dog treats.
